SUPER ERECTA® SHELVING SYSTEM

Genuine Metro.

**Metro Fact:**

Metro created the original post-based shelving unit in 1965. Still today, Metro Super Erecta Shelving is recognized worldwide as the most popular commercial shelving system ever.

**NSF**

Super Erecta® Shelving System

The original wire storage system.

A storage system that defines the extent of space, Super Erecta's revolutionary concept was fresh and innovative from its start—nearly 50 years ago. It has continued to evolve, with nearly 100 highly specialized accessories, aimed at meeting the diversity of today's challenges.

- **Adjustable:** Shelves can be repositioned at precise 1" (25mm) increments along the length of the numbered posts.
- **Unique Design:** Open-wire design minimizes dust accumulation, allows a free circulation of air, and greater visibility of stored items.
- **Mobile:** Full choice of caster types available for mobile applications.

SiteSelect posts provide a visual guide for positioning and adjusting shelves, saving considerable time during assembly and adjustment. An easy-to-identify double groove, every 8" (203mm), offers a quick way to align all shelves.

Shelving Post Guide

Standard Stationary Post with adjustable leveling foot. Stainless models also feature a stainless leveling foot. Use Foot Plates for greater stability.

Standard Stem Caster Mobile Post accepts a Metro stem caster. Use these for the majority of standard duty transport and movable storage applications.

Cart Wash and Autoclave Applications
Swaged stainless post has a fastened aluminum post cap and is specifically designed to withstand high temperatures. See page 50 for part numbers.

Heavy Duty Transport
Staked post attaches to a dolly truck to address abusive transport applications. The reinforced connection between the base receptacle and post provides a more secure connection to the dolly truck. See page 52 for part numbers.

Important: In stationary shelving, stability decreases as the ratio of height to width increases and when heavier loads are placed on upper shelves. Shelving stability is attained by keeping units as wide and low as possible, and placing heavy loads low on the shelving unit.

Cantilever Shelves — {10.05}

Adds convenient space above a storage unit. Drop mat design creates a retaining ledge around the entire 12" (305mm) deep shelf. Remember to order rear posts taller than front posts to accommodate these shelves.

SUPER ERECTA® STEM CASTER CARTS

Super Erecta Mobile Shelving and Transport Carts

Stem Caster Carts (Standard-Duty Mobile Shelving)

- The most common configuration for mobile shelving.
- They are primarily used for applications where the shelving is periodically moved to clean or to transport goods short distances within a facility.
- The weight capacity of the cart is determined by the casters. Typical configurations range from 600-900 lbs. (272-363kg) total unit capacity.

Dolly Trucks (Heavy-Duty Mobile Shelving)

- Carts configured with dolly bases are recommended for heavier duty applications. The dolly base is shock absorbent and the heavier duty plate casters are designed to withstand abusive conditions.
- Dolly trucks are recommended when the carts must travel longer distances, over thresholds, and/or between facilities on a regular basis.
- Dolly trucks can transport up to 1,000 lbs. (454kg) evenly distributed.

The following information is to assist you in the selection of the appropriate caster for your specific application. Remember, the selection of the proper caster is determined by the load requirements, the operating environment, and other special conditions.

Wheel Material	Resistance to Oil & Grease	Rollability	Floor Protection	Noise
Resilient Rubber	LOW	FAIR	GOOD	LOW
Neoprene	HIGH	GOOD	GOOD	LOW
Polyurethane	HIGH	GOOD	GOOD	MODERATE
High-Modulus Rubber	HIGH	GOOD	GOOD	LOW
Conductive	LOW	FAIR	GOOD	LOW

Caster Tips:

1. The total weight of the equipment and its load should not exceed three times the load rating per caster.
2. Given the same wheel material, the larger the wheel diameter, the greater the load capacity and the better the rollability.
3. Caster mounting patterns affect maneuverability and steering of the equipment.

For maneuverability, use 4 swivel casters.

For steering control use 2 swivel and 2 rigid casters.

4. Plate casters generally have wheels of larger diameter and can usually carry more weight and take more abuse than stem casters.
5. Ball bearings and roller bearings in the wheel generally perform better and carry more weight than engineered plastic bearings or sintered metal bearings. Metro stem casters in the SMP and the SMDA series have ball bearings in the swivel and the wheel. Most plate casters have ball bearings in the swivel and ball or roller bearings in the wheel.
6. Wheel tread shapes are generally flat, rounded or tapered. Tapered wheels, like donut-shaped wheels, tend to roll more easily. High-modulus donut wheels offer resiliency and mobility, reduce noise, and absorb shock on uneven or rough floors.

Additional stem and plate casters, in various sizes, are available.

SUPER ERECTA® DOLLIES

Made-to-Order Truck Dollies (Aluminum)* — {11.37}

Select the desired dolly size from the chart below and combine with the desired plate casters found on page 53.

The caster plate style must be specified at the time of order — "B" or "C" plate. The dollies are modified at the factory prior to shipment.

For example, D2448NCB, four #B5P = one aluminum dolly frame with four 5" B-plate swivel polyurethane casters designed to accommodate nominal 24" x 48" (610 x 1219mm) shelves.

Dolly Frame

Metro Fact:

Metro dolly frames and stock truck dollies add 3¹/₈" (78mm) to the length of the unit and 3³/₈" (87mm) to the unit width.

Stainless steel frames and stacked posts are recommended for heavy-duty applications.

SUPER ERECTA® PLATE CASTERS

Plate Casters — {11.37}

Use in conjunction with Metro "Made-to-Order" truck dollies to assemble a heavy-duty mobile base for your needs. Important: The caster plate style must be specified at the time of order — "B" or "C" plate. The dollies are modified at the factory prior to shipment.

Top view of caster plates

B-plate casters offer good impact resistance for common thresholds.

C-plate casters offer the thickest metal chassis and largest wheels for the most abusive conditions and heaviest storage loads.

General Guidelines for Metro Carts Used in Over-the-Road Applications

For applications where carts are loaded on to or off of trucks for transportation, and/or where thresholds exceeding 3/8" in height are repeatedly encountered:

- A dolly is recommended for maximum useful life.
- Casters of at least 6" diameter are recommended. Consideration should be given to the shock absorbing ability of the caster wheel, but selection will need to be based upon the specifics of the application.
- Aluminum split sleeves and staked posts should be used.
- Weight load should be limited to approximately 750 lbs. depending on the specifics of the application.

Consult your Metro representative with the details of the Over-the-Road application. Each application is unique, and the preceding points are intended only as general guidelines.

See page 51 for additional specifications and appropriate parameters for all types of Metro casters.

SUPER ERECTA® TRUCK CASTERS & ACCESSORIES

Brake Lock/Swivel Lock Combination Casters — {11.70}

Patented, foot-operated design enables a single pair of casters to serve as swivel, rigid or brake casters. Conveniently positioned on the dolly, not on the wheels, the downward pressure pedals prevent scuffing of shoes.

Brake Lock/Swivel Lock combination casters

- **How It Works**
Brake lock/swivel lock caster sets are operated by two separate foot pedals. One pedal locks the two wheels in a rigid position or releases them to swivel; the other pedal engages and releases brakes on the same two wheels.
- **Convenient**
Pedals are on the dolly, not the wheels, making operation more convenient. Downward pressure on the pedals save shoes from scuffing.
- **Casters**
Long wearing polyurethane. Resists abrasion. Non-marking, shock absorbing. Wheels are available in 6" (152mm) and 8" (203mm) size.
- **Recommended Caster Selection**
Two swivel casters at one end and brake/swivel lock set at the other end. Other caster combinations can be used, however, including brake/swivel lock sets at both ends. Wraparound bumper recommended.

- Wall Shelving using uprights and Metro shelves
- Customizable storage space using combinations of shelving, grids, and specialized accessories

SmartWall will keep these areas cleaner and more organized.

- Prep areas
- Janitorial supply
- Above carts that are in a staging area or a storage room
- Above sinks, work tables, casework, equipment, or bulk floor storage

Flexible, Robust Design: Wall tracks and uprights are designed to interface with wood studs, plywood, concrete, and other suitable wall structures.

Easy to Adapt: Uprights and grid brackets can be easily repositioned along the track before being fastened to the wall. Shelves and accessories are easy to add and remove.

Easy to Install: Once the tracks are installed level, shelving and task stations can be quickly configured.

Easy to Clean: Shelves, shelf supports, and grids can easily be removed for thorough cleaning of walls. Wall tracks and uprights can easily be wiped clean.

Durable Finishes: Super Erecta Brite for dry environments; Metroseal 3 epoxy for wet or damp environments with built-in Microban® antimicrobial product protection to inhibit the growth of bacteria, mold, mildew, and fungus that cause odors and product degradation.

SMARTWALL® PRODUCTIVITY SYSTEM

General Guidelines

Selecting Wall Tracks.

Wall track or combination of tracks must be at least 2" (51mm) longer than the desired span of shelves. 1" (25mm) on each end of the span of tracks is reserved for hardware that acts as a stop. (Example: If 152" (3860mm) of wall track could be mounted, then the length of a shelf tier cannot exceed 150" (3810mm).

Uprights.

- 15" (381mm) uprights: 1 shelf tier maximum
 30" (762mm) uprights: 3 shelf tiers maximum
 45" (1143mm) uprights: 4 shelf tiers maximum

Shelves.

When configuring side-by-side shelving units, the adjacent shelves on the same tier must have the same depth. Minimum space between shelf tiers is 9" (229mm).

Note: When using MetroMax i shelves with SmartWall G3 shelf supports, order one adapter kit per shelf (Cat. No. M9997-4).

Shelf Supports.

Order to match up with the depth of the shelf.

Configuring Basic Task Stations

General Guidelines

Selecting Wall Tracks

Wall track or combination of tracks must be at least 2" (51mm) longer than the desired span of shelves. 1" (25mm) on each end of the span of tracks is reserved for hardware that acts as a stop. *(Example: If 152" (3860mm) of wall track could be mounted, then the length of a shelf tier cannot exceed 150" (3810mm)).*

Grids

Grids may attach directly to the uprights. Grids may not overhang the uprights by more than 6" (152mm). When uprights are not used, select the appropriate grid bracket kit based on the configuration.

Uprights and Shelf Supports

Enable standard Super Erecta, Super Erecta Pro, MetroMax Q, and MetroMax i shelves to be used as part of the task station.

Combinations of Grids and Shelves

Grids can be mounted directly behind shelves, but shelf supports and grids cannot occupy the same slots on the upright. Once the grid has been mounted to the upright, the shelf support can be mounted to its own slots and can be adjusted on 3" (76mm) increments within the grid space.

qwikTRAK key facts

The aluminum and stainless steel floor tracks provide a smooth, gliding surface for mobile units.

- Mobile units are designed to move easily and store heavy weight loads. MetroMax i mobile qwikTRAK units can hold up to 1,200 lbs. (544kg). MetroMax Q, Super Adjustable, and Super Erecta mobile qwikTRAK units can hold up to 2,000 lbs. (907kg). MetroMax 4 units can hold up to 800 lbs. (363kg).
- Floor tracks protect the floors from wear and tear and do not require to be mounted to the floor.
- Floor tracks compensate for rough or choppy floor surfaces.

Double-Deep Configurations can be created where two systems are joined together to increase the overall depth of the storage system for even greater storage capacity.

Choose the shelving type based on the application.

Both single- and double-deep systems can be used with Metro wire shelving (Super Erecta or Super Adjustable Super Erecta) and polymer shelving systems (MetroMax i and MetroMax Q).

Note: MetroMax 4 can be used on single-deep systems.

- Floors are easy to clean.
- Utility carts can easily be rolled into and out of the active aisle.
- The guide track compensates for uneven floor surfaces and keeps units in alignment.
- Mobile units are designed to address medium-duty applications. The weight capacity of a Top-Track mobile unit is 900 lb. (410kg).

Choose the shelving type based on your application.

Top-Track (single deep) can be used with Metro wire shelving (Super Erecta or Super Adjustable Super Erecta) and polymer shelving systems (MetroMax i and MetroMax Q).

Double-Deep configurations can be created when two systems are joined together to increase the overall depth of the storage system for even greater storage capacity. Double-Deep Top-Track is only available for Super Erecta and Super Adjustable Super Erecta style shelving.

1. qwikTRAK is available with 74" posts (1880mm) as standard. Requests for TALLER posts must be reviewed by Metro Engineering. For applications requiring posts SHORTER than 74" (1880mm), contact your Metro representative.
2. Existing Metro Super Erecta, Super Adjustable, MetroMax Q, and MetroMax i shelving units can be retrofitted as part of a qwikTRAK installation.
3. Weight capacities for standard qwikTRAK: Super Erecta, Super Adjustable, MetroMax Q systems are designed to hold up to 2,000 lbs. (907kg) per shelving unit. MetroMax i stationary units can hold up to 2,000 lbs. (907kg); MetroMax i mobile units can hold up to 1,200 lbs. (544kg) per unit. MetroMax 4 stationary units can hold up to 2,000 lbs. (907kg); MetroMax 4 mobile units can hold up to 800 lbs. (363kg) per unit; mobile MetroMax 4 unit must use a MetroMax i bottom shelf.
4. Added rigidity for heavily loaded systems. Super Erecta standard adjustment shelves provide the most rigid wire shelving mobile units; Recommended when configuring systems using 60" and 72" long shelves subject to the heaviest loads and frequent movement (multiple times daily). MetroMax Q epoxy coated steel posts may be used with MetroMax i shelves for added rigidity when managing sensitive packaged items and heavier unit loads; steel posts are corrosion resistant.

The system compensates for uneven floor surfaces. Floor should be smooth and free from large cracks or raised obstacles. Maximum load capacity for mobile units is 900 lbs. (400kg).

Under normal conditions, aisle width of 30"-36" (760-914mm) is recommended. The storage of very large objects within the system, however, may require an aisle width larger than 36" (914mm).

Notes:

1. Mobile, stationary end, and intermediate units must have a minimum of 4 shelves.
2. Mobile Units: If 18" (457mm) wide mobile units are planned, the maximum allowable size shelf is 60" (1524mm) long. If 18" (457mm) wide by 60" (1524mm) long mobile units are planned, a maximum of five 18" (457mm) mobile units are allowable between two stationary units. 18" (457mm), 21" (530mm) and 24" (610mm) wide mobile units can be intermixed in a given system. The standard system requires 74" (1880mm) posts on the mobile units. Recommended maximum load rating for a mobile unit is 900 lbs. (410kg).
3. To accommodate bumpers, the actual size of a mobile unit is 2.5" (63.5mm) wider than the shelf width shown. For example, an 18" (457mm) wide unit is actually 20.5" (521mm).
4. MetroMax Q epoxy coated steel posts may be used with MetroMax i shelves for added rigidity; steel posts are corrosion resistant.

Under normal conditions, aisle width of 30"-36" (760-914mm) is recommended. The storage of very large objects within the system, however, may require an aisle width larger than 36" (914mm).

Additional Notes:

1. To accommodate bumpers, the actual size of a mobile unit is 2.5" (63.5mm) wider than the shelf width shown. For example, an 18" (457mm) wide unit is actually 20.5" (520mm).
2. Recommended maximum load rating for a mobile unit is 900 lbs. (410kg). Floor should be level, smooth, and free from large cracks and raised obstacles.
3. Added rigidity for heavily loaded systems. Super Erecta standard adjustment shelves provide the most rigid wire shelving mobile units. Recommended when configuring systems using 60" (1524mm) and 72" (1829mm) long shelves subject to the heaviest loads and frequent movement (multiple times daily).

Notes:

- Each stationary end and intermediate unit **must** have a minimum of four shelves. For all Super Adjustable applications, the top and bottom shelves must be non "quick adjust" Super Erecta shelves.
- The standard Double Deep Top-Track system requires the use of 86" (2185mm) posts (i.e., 86P) on the stationary end and intermediate units. **Shelves for the stationary end and intermediate units are sold separately.**
- The mobile unit kits include special 74" (1880mm) posts with casters. **Shelves for mobile units are sold separately.**
- Under normal conditions, an aisle width of 30"-36" (760-914mm) is recommended. The storage of very large objects within the system, however, may require an aisle width larger than 36" (914mm).
- Two intermediate shelving units connected end-to-end are required when the track length exceeds 21 feet (6400mm). Stationary intermediate shelving units may be used at the discretion of the user when track lengths are less than 21 feet (6400mm).
- The maximum Double Deep system configuration is 10'6" (3200mm) (i.e., two systems, each having 60" (1524mm) long shelves, plus 6" (150mm) for Top-Track components).
- Ease of rollability for the mobile units is an important consideration in evaluating Top-Track as a possible storage alternative. The floor should be level, smooth, and free from large cracks and raised obstacles. Two mobile shelving units connected end-to-end and loaded with between 800 to 1,200 lbs. (365-550kg) will require a human effort range (in lbs. of human force) of between 18-24 lbs. (8-11kg) to move the unit from a complete stop. Subjectively, an average 110 lb. (50kg) person will perceive this as acceptable effort levels. For loads over 1,200 lbs. (550kg), contact your Metro representative.
- Mobile units should have the top shelf positioned as close as possible to the track.
- To accommodate bumpers, the actual size of a mobile unit is 2.5" (63.5mm) wider than the shelf width shown. For example, an 18" (457mm) wide unit is actually 20.5" (521mm).
- To calculate the overall length of a Super Erecta Top Track System, add the following:
Nominal track length + Nominal widths of each end unit + 1.5" (38mm).

Getting started:

Document the available floor space

- Actual length: Nominal track length + the nominal width of each end unit + 2" (51mm)
- Actual width: Nominal Shelf length + 3 1/2" (89mm)
- Actual height of system is approx. 87" (2210mm)

It is recommended that the tracks are installed at least 5" (127mm) from the wall.

Note: Posts and shelves are included in the end and intermediate unit kits. Shelves are sold separately for the mobile unit.

Double-Length System

Add track sets and mobile unit kits, refer to page 116.

See page 120 for Stationary Seismic shelving.

Notes:

- Each installation must have two stationary end units for a single-track length of 7' (2135mm) to 11' (3355mm).
- A center strut is required for each track section over 7' (2135mm).
- For track lengths over 11' (3355mm), an intermediate unit is required, thus creating a double-length system.
- Seismic Top-Track is based upon a weight-loading capacity of 25 lbs. (11kg) per square foot on a four-shelf stationary and mobile units, with maximum of 900 lbs. (408kg) per mobile unit. Additional shelves may be added, but are limited to a maximum load of 25 lbs. (11kg) per cubic foot per unit.
- A maximum of four 21" (640mm) or 24" (610mm), or five 18" (457mm) mobile units are allowed per an 11' (3355mm) track length, with no more than a 900 lb. (408kg) weight capacity per mobile unit.
- Stationary End Units are available in 24"x48" (610x1219mm), 24"x54" (610x1370mm), and 24"x60" (610x1524mm).
- Seismic Top-Track design is based on the use of HR concrete, at least 5 1/2" (140mm) thick, with a compressive strength of 3,000 psi (211kg/cm). Anchorage is not included.
- To calculate the overall length of a Super Erecta Top Track System, add the following: Nominal track length + Nominal widths of each end unit + 1.5" (38mm).

Notes:

- Floor anchors are not included. The structural engineer of record must verify that the anchorage bolt and building structure are adequate for the applied load.
- For Seismic Top-Track, the highest load shelf must be no more than 60" (1524mm) from the floor.
- For Seismic Top-Track, a unit must have no more than four loaded shelves within 60" (1524mm) height.
- If a fifth shelf is used, it must serve only as a cover and not be used for load bearing.
- Each shelving unit, whether single or "back-to-back," cannot connect to other shelving units or walls.

Metro Tip:

Floor pad protectors compensate for soft flooring materials by protecting the floor from wear and tear. For new construction projects, it is recommended that flooring of suitable durability is used in areas where Top-Track will be installed.

qwikTRAK Stop Plate Kit

qwikTRAK Stop Plate Kit — {11.15}

Eliminates the need for a stationary end unit. The kit contains two "L-shaped" stop plates that mount to the ends of the floor tracks. The stop plates prevent a mobile unit from rolling off the end of the tracks.

Super Erecta Hi-Rise Shelving

Super Erecta® Hi-Rise Shelving — {10.17}

- For light-duty storage applications where floor space is at a premium.
- Construct shelving up to 24 feet (7315mm) high — 3 times the height of conventional shelving
- Metro's computerized engineering system assures correct specifications and load rating of Hi-Rise materials for your application.

All Hi-Rise installations must be reviewed and approved by Metro Engineering. Hi-Rise certification plate supplied. Only Super Erecta and Super Adjustable Super Erecta wire shelves (found on pages 37) can be used in Hi-Rise applications. Contact Metro customer service or your local Metro representative for details.

Metro Tip:

One frequently overlooked opportunity to gain additional storage capacity is the efficient use of vertical space. By connecting Super Erecta posts, storage areas may be created that utilize every available cubic foot of unused vertical air space.

Material part numbers will be provided by Metro Product Development upon review of application.

STARSYS® CARTS

Procedure Perfect.

Easy to clean advanced polymer material is a marked improvement over traditional metal carts; won't dent, chip, rust, flake or corrode.

Interchangeable 3", 6" and 9" (76, 152 and 230mm) drawers with removable totes can be fully extended for easy access.

Color-coded drawer pulls are available in an array of choices to fit any system or decor.

Label holders are available to quickly identify drawer contents.

Each drawer face has a $\frac{1}{2}$ " x $18\frac{3}{4}$ " (12.7 x 466.1mm) polished area allowing for secure adhesion of labels (not supplied by Metro).

The convenient overbridge can be fitted with a wide selection of baskets, shelves, and bins to keep necessary items within reach.

Swing-out Side Storage units increase work surface up to 135%.

Side storage allows easy customization of a wide variety of accessories from trash can and Sharps container to storage bins and shelves.

5" (127mm) polyurethane casters with easily accessed toe brake make for easy rolling.

Starsys Carts

Starsys provides a complete system of enclosed carts in a wide variety of heights and system widths. When mobility is a key part of your storage needs, Starsys carts provide a broad selection of unique solutions. This modular system approach allows you to create a cart to meet your exact needs.

Starsys cart widths and depth:

The Starsys cart system is built upon a square module. Multiplying this storage module results in system widths of single $22\frac{3}{4}$ " (578mm), double $42\frac{1}{2}$ " (1080mm) and triple $62\frac{1}{2}$ " (1588mm) widths. The depth on all carts is 24.9" (632mm).

Starsys cart heights:

Starsys carts are available in the following working heights: 36" (907mm), 39" (983mm), 42" (1060mm), 45" (1136mm) and 48" (1212mm).

General Overview:

Starsys carts feature 5" (127mm) swivel casters. The front two casters have a Total-Lock Toe Brake (locks both the wheel and the horn).

Starsys carts feature a smooth polymer top/worksurface. If chemical resistance is a concern or heavy equipment is likely to be placed on the top of the cart, Starsys Mobile WorkCenters may be a more appropriate product selection.

An extended mobile base is required when Heavy-Duty drawers, Active Level shelving or qwikSLOT shelving is specified in a Starsys configuration. The extended mobile base adds an additional 3" (76mm) to the overall depth of the cart. The extended base combines additional counter weights with a deeper footprint to reduce any chance of overbalance when active level shelving is fully extended.

STARSYS® SUPPLY UNITS

Supplies in demand.

Mobile Units

Mobile Units are stand-alone products. Mobile units are available in single ($22\frac{3}{4}$ " [578mm]), double ($42\frac{1}{2}$ " [1080mm]) and triple ($62\frac{1}{2}$ " [1558mm]) widths. The overall height of a tall mobile unit is $78\frac{1}{2}$ " (1990mm). Add $11\frac{3}{4}$ " (299mm) with sloped tops. All units are $24\frac{7}{8}$ " (632mm) deep.

General Overview:

The configurable interior space is 66" (1676mm) on a tall unit. Short units interior space from 24" (610mm) to 48" (1219mm) in 3" (76mm) increments.

Triple-width units must be divided into a single & double bay or three single bays — there are no triple wide accessories.

The specification of a qwikSLOT interior or an empty interior will necessitate an extended mobile base as part of the configuration.

Starsys Mobile Units have a total recommended load rating of 900 lbs. (408kg) including the weight of the Starsys unit.

Units feature two 5" (127mm) casters — the front two casters have color-matched toe-brakes.

Microban® antimicrobial protection inhibits the growth of stain and odor-causing bacteria on Starsys, keeping the surface areas "cleaner between cleanings."

Tall Stationary Units

Tall Stationary Units are stand-alone products or may be used in conjunction with other tall units or Starsys product families. Tall stationary units are available in single and double widths only.

General Overview:

The overall height of a tall stationary unit is $72\frac{1}{2}$ " (1842mm). Add $11\frac{3}{4}$ " (299mm) with sloped tops. Overall widths are $21\frac{1}{2}$ " (546mm) for singles and $41\frac{1}{2}$ " (1049mm) for doubles.

The configurable interior space is 66" (1676mm).

Filler kits are available to fill gaps between units, between the back of a unit and the wall (25" [635mm] & 30" [762mm] depths) and between tall units interfacing at 45 or 90 degrees.

All tall units must be affixed to the wall with appropriate mounting hardware utilizing the attached Starsys mounting bracket or affixed to the floor with the optional floor mounting kit.

Tall units are not intended to support cantilevered countertop sections.

STARSYS® EXTRA DEEP SUPPLY CABINETS

Get a little extra out of your supply management process with Starsys® XD.

Extra Deep (XD) design creates added capacity for increased storage space. The added space accommodates longer items and presents a novel lean two-bin approach for protected supply management. Shelves can be repositioned easily and can be set from horizontal up to a $\pm 20^\circ$ degree angle for (-) supply containment or (+) optimum visibility and accessibility, especially for the upper shelves.

XD design with low-profile shelf allows for maximum space efficiency.

XD design with shelves installed at an angle also accommodates the deeper bins available from automated supply cabinets.

STARSYS® WORKCENTERS

Let's get to work... stat.

Starsys WorkCenters

WorkCenters can be stand alone products or can be a configured section within a larger product configuration. WorkCenters combine valuable lower storage areas with finished modular countertops to offer a complete storage and work area solution.

Starsys WorkCenters are made up of two key components: base units and countertops. Understanding how these two elements work together is the key to understanding the Starsys WorkCenters line. While sections of Starsys WorkCenters can be configured into many physical combinations, these sections are typically divided into two categories: "straight run" or "corner" configurations.

Working Heights: Starsys WorkCenters are available in the following working heights: 30" (762mm), 33" (838mm), 36" (914mm), 39" (990mm) and 42" (1067mm). Within each working height there is up to 2.5" (64mm) of additional height adjustment via the four adjustable leveling feet in each base unit.

Starsys Base Units

Base units are the most critical part of a configuration with countertops. Their total combined length and placement will determine the length of the associated countertops in the design. Their placement will determine the placement and size of necessary knee wells and provide support for valuable corner work areas. All Starsys base units are available in light taupe but have the flexibility to be accented with various door & drawer handle colors. Countertop color selection and cove base color selections may be used to accent the base unit color.

Starsys Base Units widths and depth:

The Starsys cart system is built upon a square module. Multiplying this storage module results in system widths of single 22 $\frac{1}{2}$ " (578mm), double 42 $\frac{1}{2}$ " (1080mm) and triple 62 $\frac{1}{2}$ " (1588mm) widths. The depth on all carts is 24.9" (632mm).

Starsys Base Unit heights:

Starsys carts are available in the following working heights: 36" (907mm), 39" (983mm), 42" (1060mm), 45" (1136mm) and 48" (1212mm)

For overhead units and accessories, see page 136.

Microban® antimicrobial protection inhibits the growth of stain and odor-causing bacteria on Starsys, keeping the surface areas "cleaner between cleanings."

Basix®

BASIX OVERVIEW

BASIX PLUS

BASIX

Basix Plus —
all the basics plus
lighter, cleaner,
easier.

CLEANER

Infection control: Cleanliness is improved by removing unsightly accessory holes found in traditional metal carts.

LIGHTER

Lightweight aluminum drawers and polymer components make Basix Plus lighter and easier to move than typical all-steel carts.

EASIER

Ergonomic push handles molded into the cart top minimize the cart's footprint and provide a natural location for maneuvering the cart. Side mounting channels allow for easy and flexible accessorization.

A color code must be included with each cart/drawer ordered. The color code determines the color of the drawer and on solid carts the color of the cart. The quantity should equal the total number of carts.

Flexline®

Flexline is constructed of advanced polymers, designed with rounded corners and infused with Microban antimicrobial product protection for a clean, durable solution that withstands the rigors of a healthcare environment.

Metro incorporates several elements in its product design to support a facility's infection control processes:

- Microban® antimicrobial protection helps keep products "cleaner between cleanings"
- Advanced polymer and other proprietary finishes provide corrosion resistance
- Smooth rounded corners to allow for easier cleaning

Look for the "red check" symbol for this added protection.

SPECIALTY CARTS AND STORAGE

Starsys Secure I.V. Cart

The Starsys Secure I.V. Cart is a system of polymer components that offers security in a flexible storage/transport solution.

- Easily Accessible: Full extension shelves allow for I.V. solution bags to be stored standing upright or lying down while providing complete access to the entire product.
- Joint Commission Compliant: The locking feature is in compliance with the Joint Commission's medication storage standards.
- Corrosion Resistant: Corrosion-proof polymer components ensure a contamination-free environment.
- Durable: Easy to clean polymer enclosures won't chip, rust, or dent.
- Easily Maneuverable: The lighter polymer design and 5" (127mm) casters, two with brakes, allow for easier movement and transfer of product.
- Microban® Antimicrobial product protection inhibits the growth of stain and odor-causing bacteria on Starsys, keeping the surface areas "cleaner between cleanings".

CLOSED CASE CARTS

Case Carts — {33.10}

The functional design of Metro Case Carts maximize usable inside space for handling storage and transport tasks efficiently. Carts can be used wherever contents must be protected from an “unclean” environment, including free-standing ambulatory care centers, surgicenters, and hospital based or out-patient surgeries.

- **Quiet:** Embossed sides and back, reinforced top and floor, softer wheels and other noise dampeners, provide a noticeably quieter ride.
- **Efficient:** Stainless steel cabinet and optional shelves have smooth or protected edges to eliminate ripping of packs that can cause costly waste or reprocessing.
- **Proficient:** Carts are designed to maximize interior cubic storage space and minimize the exterior footprint delivering the most cubic storage capacity per square foot to provide ample capacity for transport and efficiency for staging.

CASE24-L6S-P
Cart is space efficient and can be used for minor surgery, labor and delivery and outpatient procedures. Low capacity with functional work surface.

CASE36-L6S-P
Cart for the majority of applications. Medium capacity with functional work surface.

CASE48-L6S-P
Cart for large cases commonly used for orthopedics. High capacity with functional work surface.

CASE24-H6S-P
High-profile cart saves floor space and minimizes bending. Medium capacity, small footprint.

CASE36-H6S-P
Cart for large or multiple cases, commonly used for orthopedics. High capacity, moderate footprint.

Each shelf includes two attachment brackets.
Shelf weight capacity is 150 lbs. (68kg) evenly distributed.

Note: Metro Closed Case Carts are cart washable. The cart wash chamber must be non-pressurized. Water temperatures in the range of 140°-180°F (60°-82° C) are allowed with an exposure period not to exceed 30 minutes. Hot air drying is allowed with the temperatures not to exceed 200°F (93°C) and an exposure period not to exceed 15 minutes. Contact your Metro representative if cart wash parameters fall outside of above specifications.

Optional wire roller shelf, pulls out halfway, easily and quietly, even at the bottom level where accessibility is vital. Also available in solid or wire pullout without roller.

Ergonomically designed, full length handles (on both sides of the low profile carts) allow for convenience in pushing or pulling from either end and provide better cart control.

Detachable brackets, which hold shelves, remove for faster and easier cleaning and drying. Brackets attach and detach quickly from "keyhole" slots for easy shelf adjustability at 2" (51mm) increments.

Double panel door for optimum strength. Recessed latch eliminates a catch point. Two door models have a center flange to stop splashes from entering cart.

All stainless steel construction. Grease sealed stainless steel ball-bearings with zerk fittings. Available in 6" (152 mm) diameter, swivel, brake-lock and swivel-lock tracking options.

Rounded wheel tread provides less surface contact, improving rollability. Softer tread absorbs more energy while rolling — reducing overall cart noise.

TERMS AND CONDITIONS (SUBJECT TO CHANGE)

Standard Terms and Conditions of Sale

These Terms and Conditions, the attendant quotation or acknowledgment, and all documents incorporated by specific reference therein will be the complete and exclusive statement of the terms of the agreement governing the sale of goods ("Goods") by InterMetro Industries Corporation and its divisions ("Seller") to Customer ("Buyer"). Buyer's acceptance of the Goods will manifest Buyer's assent to these terms and conditions. If these terms and conditions differ in any way from the terms and conditions of Buyer's order, or other documentation, this document will be construed as a counteroffer and will not be deemed an acceptance of Buyer's terms and conditions which conflict herewith, and to the extent there is any conflict between the terms and conditions herein and any purchase order or other document from the Buyer, the terms and conditions herein shall govern and prevail.

1. Prices:

Unless otherwise specified in writing by Seller, Seller's price for the Goods shall remain in effect for thirty (30) days after the date of Seller's quotation or acknowledgment of Buyer's order for the Goods, whichever occurs first, provided an unconditional, complete authorization for the immediate shipment of the Goods is received and accepted by Seller within such time period. If such authorization is not received by Seller within such thirty (30) day period, Seller shall have the right to change the price for the Goods to Seller's price for the Goods at the time of shipment.

2. Taxes:

Any tax or governmental charge or increase in same hereafter becoming effective increasing the cost to Seller of producing, selling or delivering the Goods or of procuring material used therein, and any tax now in effect or increase in same payable by the Seller because of the manufacture, sale or delivery of the Goods, may at Seller's option, be added to the price.

3. Terms and Payment:

Seller shall have the right, among other remedies, either to terminate the agreement or to suspend further performance under this and/or other agreements with Buyer. Buyer shall be liable for all expenses, including attorneys' fees, relating to the collection of past due amounts.

Written approval is required from the Seller's factory to return merchandise. All merchandise must be returned within forty-five (45) days from the invoice date and be returned in original, unopened, and resalable packaging. A Return Merchandise Authorization (RMA) must be obtained through Seller's customer service department prior to returning the product. All costs of returned items, including shipping and insurance shall be the responsibility of the Buyer.

Customer service will relay percentage of order completed along with the Change/Cancellation Fee amount. Prior to Seller accepting the change, a revised purchase order (including associated Fee) is required. Orders for C5 cabinets with an "A" suffix are non-cancellable.

Buyer may request changes or additions to the Goods consistent with Seller's specifications and criteria. In the event such changes or additions are accepted by Seller, Seller may revise the price and delivery schedule.

Seller reserves the right to change designs and specifications for the Goods without prior notice to Buyer, except with respect to Goods being made-to-order for Buyer.

4. Shipment and Delivery:

Shipments are made FOB Seller's shipping point. Seller reserves the right to split orders based on the FOB Shipping Point. Order consolidation is available for an additional charge. Buyer should contact customer service for more information. Any claims for shortages or damages suffered in transit shall be submitted by the Buyer directly to the carrier. While Seller will use all reasonable commercial efforts to maintain the delivery date acknowledged or quoted by Seller, all shipping dates are approximate. Seller reserves the right

to make partial shipments and to segregate "specials" and made-to-order Goods from normal stock Goods. Seller shall not be bound to tender delivery of any Goods for which Buyer has not provided shipping instructions.

5. Limited Warranty:

(a) Subject to the limitations of Section 6, Seller warrants that the Goods will be free from defects in material and workmanship under normal use, service and maintenance for a period of one year (unless otherwise specified by Seller in writing) from the date of shipment of the Goods by Seller. This warranty does not extend to any losses or damages due to misuse, accident, abuse, neglect, normal wear and tear, unauthorized modification or alteration, use beyond rated capacity, or improper installation, maintenance or application. To the extent that Buyer or its agents has supplied specifications, information, representation of operating conditions or other data to Seller in the selection or design of the Goods and the preparation of Seller's quotation, and in the event that actual operating conditions or other conditions differ from those represented by Buyer, the warranties or other provisions contained herein which are affected by such conditions shall be null and void. If, within thirty (30) days after Buyer's discovery of any warranty defects within the warranty period, Buyer notifies Seller thereof in writing, Seller shall, at its option, repair or replace F.O.B. point of manufacture, or refund the purchase price for that portion of the Goods found by Seller to be defective. Failure by Buyer to give such written notice within the applicable time period shall be deemed an absolute and unconditional waiver of Buyer's claim for such defects. Goods repaired or replaced during the warranty period shall be covered by the foregoing warranty for the remainder of the original warranty period or ninety (90) days, whichever is longer. Buyer assumes all other responsibility for any loss, damage, or injury to persons or property arising out of, connected with, or resulting from the use of Goods, either alone or in combination with other products/components.

Standard Terms and Conditions of Sale

(continued)

corrections shall be made available from time to time to those Buyers purchasing applicable contract maintenance services from the Seller.

(d) SECTIONS 5 AND 6 APPLY TO ANY ENTITY OR PERSON WHO MAY BUY, ACQUIRE OR USE SELLER'S GOODS, INCLUDING ANY ENTITY OR PERSON WHICH BUYS THE GOODS FROM SELLER'S DISTRIBUTOR AND SUCH ENTITY OR PERSON SHALL BE BOUND BY THE LIMITATIONS THEREIN.

6. Limitation of Remedy and Liability:

THE SOLE AND EXCLUSIVE REMEDY FOR BREACH OF ANY WARRANTY HEREUNDER (OTHER THAN THE WARRANTY PROVIDED UNDER SECTION 11) SHALL BE LIMITED TO REPAIR, REPLACEMENT OR REFUND OF THE PURCHASE PRICE OF THE AFFECTED GOODS. SELLER SHALL NOT BE LIABLE FOR DAMAGES CAUSED BY DELAY IN PERFORMANCE, AND IN NO EVENT, REGARDLESS OF THE FORM OF THE CLAIM OR CAUSE OF ACTION (WHETHER BASED IN CONTRACT, INFRINGEMENT, NEGLIGENCE, STRICT LIABILITY, OTHER TORT OR OTHERWISE), SHALL SELLER'S LIABILITY TO BUYER AND/ OR ITS CUSTOMERS EXCEED THE PRICE PAID BY THE BUYER FOR THE SPECIFIC GOODS PROVIDED BY SELLER GIVING RISE TO THE CLAIM OR CAUSE OF ACTION. BUYER AGREES THAT IN NO EVENT SHALL SELLER'S LIABILITY TO BUYER AND/OR ITS CUSTOMERS EXTEND TO OR INCLUDE INCIDENTAL, CONSEQUENTIAL OR PUNITIVE DAMAGES. THE TERM "CONSEQUENTIAL DAMAGES" SHALL INCLUDE, BUT NOT BE LIMITED TO, LOSS OF ANTICIPATED PROFITS, LOSS OF USE, LOSS OF REVENUE, COST OF CAPITAL AND DAMAGE OR LOSS OF OTHER PROPERTY OR EQUIPMENT.

It is expressly understood that any technical advice furnished by Seller with respect to the use of the Goods is given without charge, and Seller assumes no obligation or liability for the advice given, or results obtained; all such advice being given and accepted at Buyer's risk.

7. Excuse of Performance:

Seller shall not be liable for delays in performance or for non-performance due to acts of God; acts of Buyer; war, riot, fire, flood, power surges, other severe weather, sabotage, or epidemics; strikes or labor disturbances; governmental requests, restrictions, laws, regulations, orders or actions; unavailability of or delays in transportation; default of suppliers; or unforeseen circumstances or any events or causes beyond Seller's reasonable control. Deliveries may be suspended for an appropriate period of time as a result of the foregoing. If Seller determines that its ability to supply the total demand for the Goods is hindered, limited or made impracticable due to causes addressed in this Section 7, Seller may allocate its available supply of the Goods or such material (without obligation to acquire other supplies of any such Goods or such materials) among itself and its purchasers on such basis as Seller determines to be equitable without liability for any failure of performance which may result therefrom. Deliveries suspended or not made by reason of this Section 7 may be canceled by Seller upon notice to Buyer without liability, but the balance of the agreement shall otherwise remain unaffected.

8. Software:

Notwithstanding any other provision herein to the contrary, Seller or applicable third party licensor to Seller shall retain all rights of ownership and title in its respective Software, including without limitation all rights of ownership and title in its respective copies of such Software. Except as otherwise provided herein, Buyer is hereby granted a nonexclusive, non-transferable royalty free license to use the Software incorporated into the Goods solely for purposes of Buyer properly utilizing such Goods purchased from Seller. All other Software shall be furnished to, and used by Buyer only after execution of Seller's (or the licensor's) applicable standard license agreement.

9. Tooling:

Tool, die, and pattern charges, if any, are in addition to the price of the Goods and are due and payable upon completion of the tooling. All such tools, dies and patterns shall be and remain the property of Seller. Charges for tools, dies, and patterns do not convey to Buyer title, ownership interests in, or rights to possession or removal, nor prevent their use by Seller for other purchasers, except as otherwise expressly provided by Seller and Buyer in writing with reference to this provision.

10. Assignment:

Buyer shall not assign its rights or delegate its duties hereunder or any interest therein or any rights hereunder without the prior written consent of the Seller, and any such assignment, without such consent, shall be void.

11. Patents and Copyrights:

Subject to Section 6, Seller warrants that the Goods sold, except as are made specifically for Buyer according to Buyer's specifications, do not infringe any valid U.S. patent or copyright in existence as of the date of delivery. This warranty is given upon the condition that Buyer promptly notify Seller of any claim or suit involving Buyer in which such infringement is alleged, and that Buyer cooperate fully with Seller and permit Seller to control completely the defense or compromise of any such allegation of infringement. Seller's warranty as to use only applies to infringements arising solely out of the inherent operation (1) of such Goods, or (2) of any combination of Goods in a system designed by Seller. In the event such Goods, singularly or in combination, are held to infringe a U.S. patent or copyright in such suit, and the use of such Goods is enjoined, or in the case of a compromise by Seller, Seller shall have the right at its option and expense to: (i) procure for Buyer the right to continue using such Goods; or (ii) replace them with non-infringing Goods; or (iii) modify same to become non-infringing; or (iv) grant Buyer a credit for the depreciated value of such Goods and accept return of them.

All information (including but not limited to pricing, descriptions, specifications and drawings) provided by Seller in email, literature, website, quotations, order acknowledgements or other is proprietary in nature and deemed CONFIDENTIAL intended for use solely by the designated party.

TERMS AND CONDITIONS

Seller's name, logo, designs, drawings, trademarks and other intellectual property remains the property of Seller and may not be disclosed, reproduced, or used without its prior written consent.

12. General Provisions:

These terms and conditions supersede all other communications, negotiations and prior oral or written statements regarding the subject matter of these terms and conditions. No change, modification, rescission, discharge, abandonment or waiver of these terms and conditions shall be binding upon the Seller unless made in writing and signed on its behalf by a duly authorized representative of Seller. No conditions, usage of trade, course of dealing or performance, understanding or agreement purporting to modify, vary, explain, or supplement these terms and conditions shall be binding unless hereafter made in writing and signed by the party to be bound, and no modification or additional terms shall be applicable to this agreement by Seller's receipt, acknowledgment, or acceptance of purchase orders, shipping instruction forms, or other documentation containing terms at variance with or in addition to those set forth herein. Any such modifications or additional terms are specifically rejected by Seller. No waiver by either party with respect to any breach or default or of any right or remedy, and no course of dealing, shall be deemed to constitute a continuing waiver of any other breach or default or of any other right or remedy, unless such waiver be expressed in writing and signed by the party to be bound. All typographical or clerical errors made by Seller in any quotation, acknowledgment or publication are subject to correction.

The validity, performance, and all other matters relating to the interpretation and effect of this agreement shall be governed by the law of the Commonwealth of Pennsylvania. Buyer and Seller agree that the proper venue for all actions arising in connection herewith shall be only in the Court of Common Pleas of Luzerne County, Pennsylvania or the United States District Court for the Middle District of Pennsylvania, and the parties agree to submit to such exclusive jurisdiction. No action, regardless of form, arising out of transactions relating to this agreement or underlying agreement, may be brought by either party more than two (2) years after the cause of action has accrued. The United Nations Convention for the International Sales of Goods shall not apply to this agreement.

Buyer agrees that all applicable import, export control and sanctions laws, regulations, orders and requirements, as they may be amended from time to time, including without limitation those of the United States, the European Union and the jurisdictions in which Seller and Buyer are established or from which items may be supplied, and the requirements of any licenses, authorizations, general licenses or license exceptions relating thereto will apply to its receipt and use of hardware, software, services and technology.
